PROFILE

A verbally articulate business analyst with previous experience in manufacturing and healthcare environment is seeking to expand his career as a data/financial analyst beyond the healthcare field. I have a strong background in large data manipulation and comprehensive knowledge of Microsoft Excel, Access and SQL server. I was recognized at my previous position for having a rigorous mathematical background and demonstrated exceptional leadership and organizational skills. Co-workers and managers alike recognized me for critical analysis of financial data for discrepancies within databases and expertise in reporting and presenting.

EDUCATION

Western Michigan University

Bachelors of Arts & Sciences

Major: Economics / Finance and General Business
